Clients

We operate at the heart of our clients’ businesses, helping address their most complex, mission-critical issues. Accenture’s clients span the full range of industries around the world and include 91 of the Fortune Global 100 and more than three-quarters of the Fortune Global 500.

Industry Expertise

Accenture provides services and solutions across more than 40 industries in five industry groups. This industry focus gives Accenture’s professionals a thorough understanding of industry evolution, business issues and applicable technologies, enabling us to deliver innovative solutions tailored to each client.

Technology Leadership

As the largest independent technology services provider, we have a privileged position in the ecosystem and are a leading partner of many key players, including SAP, Microsoft, Oracle, Salesforce and Workday. The scale and scope of our global delivery capabilities are unmatched, with skilled professionals working from more than 50 delivery centers and at client sites around the world.
SERVICES

Strategy & Consulting works with C-suite executives and boards of the world’s leading organizations, helping them accelerate their digital transformation to enhance competitiveness, grow profitability and deliver sustainable stakeholder value. We use our deep industry and functional expertise underpinned by data, analytics, artificial intelligence, and innovation to help clients solve a diverse set of business challenges, including identifying and developing new markets, products and services; optimizing cost structures; maximizing human performance; harnessing data to improve decision-making; mitigating risk and enhancing security; implementing modern change management programs; shaping and delivering value from large-scale cloud migrations; building more resilient supply chains; and reinventing manufacturing and operations with smart, connected products and platforms.

Interactive combines creativity and technology in service of meaningful experiences that drive sustainable growth and value for our clients. Our capabilities span ideation to execution: growth, product and culture design; technology and experience platforms; creative, media and marketing strategy; and campaign, content and channel orchestration. With strong client relationships and deep industry expertise, we are uniquely positioned to design, build, communicate and run experiences, reimagining the entire journey for customers, employees, patients and citizens alike. We embed this focus on experience across our services.

Technology provides innovative and comprehensive services and solutions that span cloud, systems integration and application management; security; intelligent platform services; infrastructure services; software engineering services; data and artificial intelligence; and global delivery through our Advanced Technology Centers. We continuously innovate our services, capabilities and platforms through early adoption of new technologies such as blockchain, robotics, 5G, quantum computing and Edge computing. Technology also leads the innovation and R&D activities in our Labs, our investments in emerging technologies through Accenture Ventures, and the management of our ecosystem alliance relationships across a broad range of technology providers.

Operations operates business processes on behalf of clients for specific enterprise functions, including finance and accounting, sourcing and procurement, supply chain, marketing and sales, as well as industry-specific services, such as platform trust and safety, banking, insurance and health services. We help organizations to reinvent themselves through intelligent operations, enabled by SynOps, our human-machine platform, powered by data and analytics, artificial intelligence, digital technology, and exceptional people to provide tangible business outcomes at speed and scale, including improved productivity and customer experiences as well as sustained long-term growth.
