Everest Group PEAK Matrix™ for PO Service Providers

Focus on Accenture
April 2018
Introduction and scope

Everest Group recently released its report titled “Procurement Outsourcing Service provider Landscape with Service PEAK Matrix™ Assessment 2018.” This report analyzes the changing dynamics of the PO landscape and assesses service providers across several key dimensions.

As a part of this report, Everest Group updated its classification of 13+ service providers on the Everest Group PEAK Matrix™ for PO into Leaders, Major Contenders, and Aspirants. The PEAK Matrix is a framework that provides an objective, data-driven, and comparative assessment of PO service providers based on their absolute market success and delivery capability. Everest Group also identified three service providers as the “2018 PO Market Star Performers” based on the strongest forward movement demonstrated on the PEAK Matrix year-on-year.

Based on the analysis, Accenture emerged both as a Leader and a Star Performer. This document focuses on Accenture’s PO experience and capabilities and includes:

- Accenture’s position on the PO PEAK Matrix
- Accenture’s year-on-year movement on the PO PEAK Matrix
- Detailed PO profile of Accenture

Buyers can use the PEAK Matrix to identify and evaluate different service providers. It helps them understand the service providers’ relative strengths and gaps. However, it is also important to note that while the PEAK Matrix is a useful starting point, the results from the assessment may not be directly prescriptive for each buyer. Buyers will have to consider their unique situation and requirements, and match them against service provider capability for an ideal fit.
Everest Group distinguishes between the Source-to-Contract (S2C) and Procure-to-Pay (P2P) processes

- Everest Group’s analyses include multi-process PO contracts with a minimum of three procurement processes, over US$1 million in ACV, and a minimum contract term of three years. Typically, the managed spend is greater than US$50 million.
- Everest Group’s analyses include all multi-process PO contracts signed as of 2017.
1. Service providers scored using Everest Group’s proprietary scoring methodology given on page 17
**Accenture is a PO Star Performer based on the strong forward and upward movement over time on the Everest Group PEAK Matrix**

### Market impact in 2017

- Accenture signed new contracts worth over US$90 million in TCV with the addition of 9 new clients globally
- In 2017, the majority of the new clients came from North America. However, it also signed some new contracts in Latin America and Europe
- In terms of buyer industries, Accenture attained the highest traction in CPG & retail, followed by energy & utilities

### Vision and capability enhancements in 2017

- Accenture introduced a procurement innovation network with sessions planned around the world, and market discovery initiatives aimed at providing robust self-service access to market intelligence from various sources
- It continued investments in data, analytics, and automation to enable the operationalization of digital procurement
  - Accenture launched Procurement Enablement Services (PES) workflow to further digitalize the processes used to deliver buying enablement
- It opened two new delivery centers in China and India to expand capacity and delivery capabilities

Capabilities

Key PO leaders
- Keith Hausmann, Global Procurement Business Leader
- Kristin Ruehle, Global Procurement BPS Offering Leader
- Thomas Fahey, Global Procurement CTO

PO service suite
Comprehensive and flexible sourcing and procurement capabilities encompassing business process services, design, and transformational change management for all S2P processes, both direct and non-core spend. Also, procurement systems support and performance management and reporting services. S2P services include:
- Sourcing & Category Management: category strategy development & planning, strategic sourcing, contracting, supplier performance management, supplier risk management, compliance management, spend, savings & compliance analytics, category & market analytics, and continuous cost improvements
- Transactional procurement: buying channel strategy development, buyer & supplier portal development, P2P process design, payment strategy and vendor master data management, eProcurement technology deployment & application management, supplier enablement, eCatalog & content management, payment strategy, requisition processing, Time & Expense (T&E) management, payment accuracy & controls, compliance management, and performance analytics

Category expertise
IT/telecom; logistics; marketing & media; energy; equipment, engineering & construction; basic materials & packaging; industrial & MRO; human resources; contingent labor; professional services; property & facilities management; travel; and direct spend with specialists across 40 industries

Spend managed for external clients
More than US$168 billion

Key PO-related developments
- 2017: invested in the operationalization of digital procurement; developed & implemented tools and integration of data, analytics, and automation capabilities to increase visibility and enhance the utility of the proprietary intelligence. Currently, over 50% of current S2P processes are automated
- 2017: developed the Hiperos SRM platform to industrialize supplier segmentation, contract compliance, supplier performance, and risk management.
- 2017: introduced high velocity sourcing and procurement Solution designed for fast, simplified implementations of SAP® Ariba® solutions to address procurement challenges
- 2017: launched a procurement innovation network with sessions planned throughout the globe. Objectives include driving co-innovation, forums for peer collaboration, concept testing of new products and services, keeping a pulse on market trends & client challenges, and strengthening relationships
- 2017: opened two new delivery centers: Chengdu (China), and Mumbai (India) to expand delivery capabilities and capacity

1. Does not include accounts payable and supply chain BPO FTEs
Major PO clients

Microsoft, Glencore, Givaudan, Danone, Unilever, Royal Dutch Shell, and multinational corporations in the following industries: banking, insurance & financial services, consumer goods, energy, communications, electronics, pharmaceutical, food & beverage, chemical, healthcare, retail, mining, printing, aerospace & defense, semiconductor, and transportation

EGR-2018-22-E-2598
## Everest Group assessment – Leader

### Strengths

- Accenture leads the procurement outsourcing market with offerings and capabilities across the entire Source-to-Pay (S2P) space. It has a strong focus on enabling the client’s procurement transformation journey through digital, touchless transactions, and seamless customer experience.
- It continues to improve its procurement offering through investments in the right technology platforms, analytics solutions, and talent model.
  - It has invested in proprietary and third-party market platforms pertaining to data, analytics, and automation. It enabled cloud-based intelligent automation in RADIX platform, enhanced its Intelligent Automation Platform (IAP), and created Procurement Enablement Services (PES) workflow to further digitize processes.
  - It leverages market intelligence and analytics applications with cross-client insights to enable better data visibility and insights. For instance, one of its major R&D initiatives is “Market Discovery,” which uses AI to provide self-service access to market intelligence using both proprietary and public sources.
  - It has built a strong talent base of over 15,000 specialists and 1,500 category experts. It also expanded delivery presence in APAC with the addition of four new delivery centers.
- It continues to make investments in next-generation solutions and create AI-enabled customer experiences.
  - It is creating AI Advisors, which can augment human sourcing experts to effectively identify sourcing opportunities & evaluate sourcing outcomes.
  - It has partnered with several external partners and a wide range of technology providers including Dialogflow (chatbot frameworks), Neo4j (knowledge graphs), and Elasticsearch (information retrieval) to advance its AI initiatives.
- Along with a strong presence in North America and Europe, it registered good traction in the emerging geographies of Asia Pacific and Latin America in the past couple of years.
- Buyers have highlighted Accenture’s operational discipline, scalability, and domain expertise as key strengths.

### Areas of improvement

- After building a strong base of large buyers, Accenture can now look at making dedicated efforts to onboard Small and Medium Businesses (SMBs) and mid-market buyers through more customized and flexible offerings and try to position itself as an accessible provider even for clients with limited outsourcing scope.
- Accenture’s clients have felt that it should be more proactive and suggest ways to provide future guidance based on market triggers and its strong domain expertise.
- Some clients have also highlighted that Accenture’s domain expertise and processes sometimes need more flexibility, especially when clients have unique/different business structures. It needs to work on customizing offerings as per clients organization’s requirements.

### Measure of capability:

</table>

### Market impact:

- **Market adoption**: High
- **Portfolio mix**: High
- **Value delivered**: High

### Vision & capability:

- **Scope of services offered**: High
- **Innovation and investments**: High
- **Delivery footprint**: High
- **Vision and strategy**: High
- **Overall**: High
Appendix
Traditionally, PO has been limited primarily to a function-focused definition.
Beyond the process dimension, PO contracts also have a “procurement-spend category” dimension

<table>
<thead>
<tr>
<th>High prevalence of third-party outsourcing</th>
<th>Low prevalence of third-party outsourcing</th>
</tr>
</thead>
</table>

### Core spend
- Goods and services that are key ingredients to manufacture/deliver the final product/service
- They are proprietary or specific to the organization
- For example: Iron-ore for a steel manufacturer and rubber for a tire manufacturer

### Non-core direct spend
- Goods and services that are commonly required to manufacture/deliver the final product/service
- They are commodities in that industry
- For example: Lubricants, packaging, and Maintenance, Repair, & Overhaul (MRO)

### Non-core spend
- Non-production goods and services that are not required to manufacture/deliver the final product/service but are required to operate the organization
- For example: Spend categories such as facilities, office supplies, travel & logistics, marketing-/sales-related spend, and IT/telecom

### Source-to-Pay (S2P) cycle
- Source-to-Contract (S2C)
- Procure-to-Pay (P2P)
Everest Group PEAK Matrix™ is a proprietary framework for assessment of market impact and vision & capability
Services PEAK Matrix™ evaluation dimensions

Measures impact created in the market – captured through three subdimensions

- **Market adoption**
  - No. of clients, revenue base, and YOY growth, deal value/volume

- **Portfolio mix**
  - Diversity of client/revenue base across geos and type of engagements

- **Value delivered**
  - Value delivered to the client based on customer feedback and transformational impact

---

Vision & capability

Measures ability to deliver services successfully. This is captured through four subdimensions

- **Vision and strategy**
  - Vision for the client and itself; future roadmap and strategy

- **Scope of services offered**
  - Depth and breadth of services portfolio across service sub-segments / processes

- **Innovation and investments**
  - Innovation and investment in the enabling areas, e.g., technology IP, industry/domain knowledge, innovative commercial constructs, alliances, M&A, etc.

- **Delivery footprint**
  - Delivery footprint and global sourcing mix
Everest Group confers the Star Performers title on providers that demonstrate the most improvement over time on the PEAK Matrix™

Methodology

Everest Group selects Star Performers based on the relative YOY improvement on the PEAK Matrix.

In order to assess advances on market impact, we evaluate each service provider’s performance across a number of parameters including:
- Yearly ACV/YOY revenue growth
- # of new contract signings and extensions
- Value of new contract signings
- Improvement in portfolio mix
- Improvement in value delivered

Star Performers are identified by top quartile performance improvement on the X and Y axes for each segment.

In order to assess advances on vision and capability, we evaluate each service provider’s performance across a number of parameters including:
- Innovation
- Increase in scope of services offered
- Expansion of delivery footprint
- Technology/domain specific investments

We identify the service providers whose improvement ranks in the top quartile and award the Star Performer rating to those service providers with:
- The maximum number of top-quartile performance improvements across all of the above parameters AND
- At least one area of top-quartile improvement performance in both market success and capability advancement

The Star Performers title relates to YOY performance for a given service provider and does not reflect the overall market leadership position, which is identified as Leader, Major Contender, or Aspirant.
About Everest Group

Everest Group is a consulting and research firm focused on strategic IT, business services, and sourcing. We are trusted advisors to senior executives of leading enterprises, providers, and investors. Our firm helps clients improve operational and financial performance through a hands-on process that supports them in making well-informed decisions that deliver high-impact results and achieve sustained value. Our insight and guidance empower clients to improve organizational efficiency, effectiveness, agility, and responsiveness. What sets Everest Group apart is the integration of deep sourcing knowledge, problem-solving skills and original research. Details and in-depth content are available at www.everestgrp.com.
